JavaScript (ES6+), Python, SQL | React.js, Redux, Flask, Vite, Material UI | Git, GitHub, REST APIs, JSON | SQLAlchemy, PostgreSQL, SQLite | OOP, Data Validation, Debugging, Error Handling | AWS, Deployment Workflow | Responsive Design | Agile Development, Team Collaboration, Communication, Continuous Learning

TECHNICAL PROJECTS

Paw-sibilities Rescue – [GitHub](#)

Full-stack web app connecting rescue pets and volunteers, enabling event sign-ups, fostering, and adoptions

- Built and deployed a full-stack app with React and Flask, delivering a responsive, intuitive user experience
- Designed reusable components with CSS Flexbox and MUI for consistent cross-device UI performance
- Implemented robust form handling with Formik and Yup, enhancing usability and data integrity
- Used Marshmallow for backend validation to ensure data consistency and improve security
- Integrated Flask-Mail for automated user notifications, increasing engagement and communication

CovenCraft – [GitHub](#)

Social full-stack web app for exploring and saving magickal crafts

- Developed a responsive UI with React, CSS Grid, and React Router for smooth, intuitive navigation
- Built a RESTful API using Flask-RESTful for seamless frontend-backend data interaction
- Implemented secure user authentication with bcrypt password hashing to protect user data
- Applied debugging and error handling strategies to boost reliability and performance

EDUCATION
